

MARPLES M44 PLOUGH PLANE

(Working Instructions overleaf)

SHAMROCK

BRAND

MARPLES M44 PLOUGH PLANE is supplied with an adjustable depth gauge and fence, and a set of eight cutters, 1/8" to 9/16" wide by 1/16ths. For wider grooves two cuts can be made.

The fence can be used on either side of the body. The depth of the face can be increased by screwing on a wood fillet.

An additional pair of short fence arms is supplied for working in confined spaces.

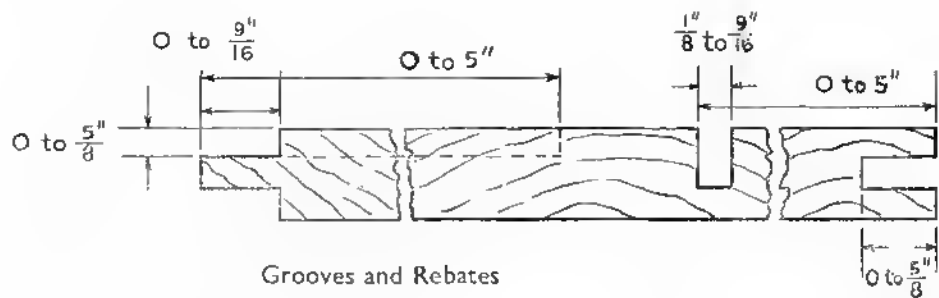

Equipped with this handy Plane, a large variety of work can be undertaken with confidence, which hitherto has been beyond your scope.

Grooves and rebates up to 5/8" deep can be cut at distances up to 5" from the edge of the board.

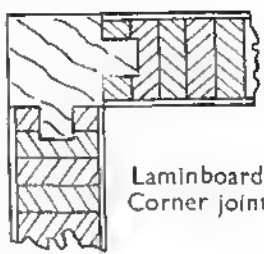

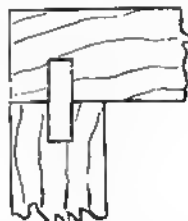

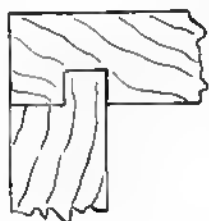

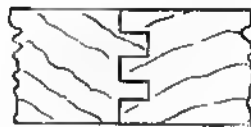

The diagrams opposite illustrate a few of the many jobs waiting for your M44 Plane.

INSTRUCTIONS

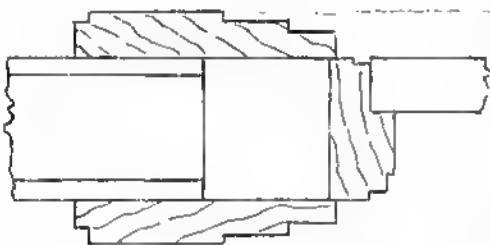

Adjust the cutter for depth, and tighten the cap screw; then screw up the cutter-clamping screw as an additional precaution, to prevent any lateral movement.
